

BIO BAG

GEM BIO BAGs can be used in a multipurpose way for the cremation, burial and transport of deceased animals.

Material: 100% laminated polypropylene non-woven fabric with polyethylene, resin zip closure, polymer glue, water-based ink.

MAIN FEATURES:

- › Psychological factor: it allows families to mourn, in the act of closing the bag
- › Ergonomic: the full opening allows an easy body insertion
- › Ecological: made of recycled material, free of chlorine and heavy metals
- › Waterproof
- › Resistant to tearing
- › Absorbent: The gel mat allows an effective absorption of fluids
- › Identification: the bag has an integrated label and a transparent window for the pet recognition

Sizes available:
