

## SEMI-AUTOMATIC ASH DISCHARGE SYSTEM

The semi-automatic ash discharge system is the ideal aid for a plant equipped with multiple cremation lines: consisting of a hydraulic arm, it eliminates the weight in managing the ash discharge process – with no energy consumption. This ergonomic solution, fully customizable according to customer needs and the layout of the plant, let the operator work in total safety and protects him from the radiant heat of the crematorium.

### MAIN FEATURES:

- › Total relief from the weight of the shovel for ash collection
- › Ideal for serving a plant equipped with multiple cremation lines
- › Protection from the heat source through a heat-resistant front screen
- › Easy to move
- › Ergonomic solution
- › Maximum safety for operators
- › No electricity consumption
- › EC markings
